## Fiduciary Services

# Our Services

## Testamentary Trust:

Allows the transfer of assets to a Trustee, who safeguards them until the trustor's death. Subsequently, the Trustee executes pre-established instructions for distributing these assets, thus respecting the original owner's last wishes.

## Guarantee Trust

A debtor assigns assets to the Trustee as collateral for a credit. The Trustee follows clear instructions for managing these assets, either releasing them once the debt is paid off or proceeding with their efficient sale in case of default.

## Administration Trust

This contract transfers all types of assets, whether movable, real, or intangible for their proper administration.

## Escrow Account

This contract essentially constitutes a simple fund intermediation, where all parties of a given business ensure that a trustworthy third party will transfer the agreed funds at the moment when the specific events motivating the contract are met.

# Escrow Solutions

We are a 100% Costa Rican company specialized in trust, with the firm vision of cornering the market in the country, due to our solidity, excellent service, confidence, and efficiency.

We offer Fiduciary Services that enable you to set specific goals; managing, safeguarding, and reinvesting your contributions to generate returns aimed at the initially stated objective.
